SAS (Software as service)

Automate the flow of the service you are providing to your customers.
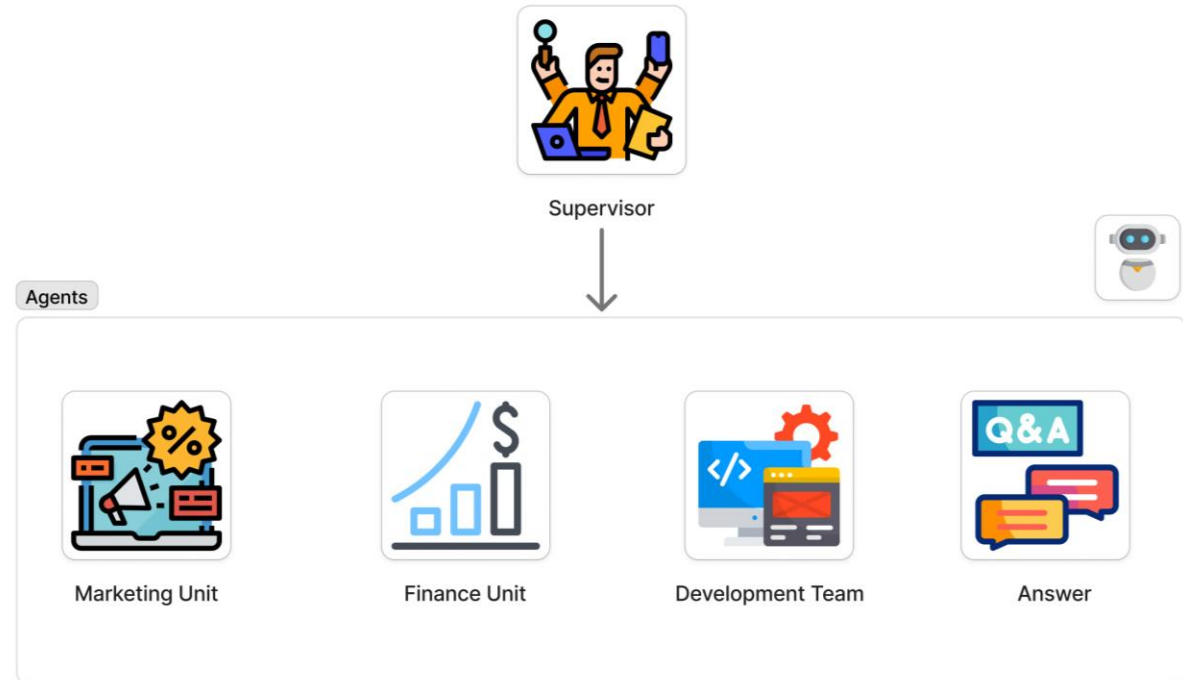

Replace each department or persona with an agent.

Replace all leaders with supervisors.

Maintain the existing reporting structure, and replicate it in a agent workflow processor using any multi-agent framework.

CDO Workflows

- Give details of Project X, including finance details and how we are trying to sell this, as well as what customers we are targeting for this.

- Create complete report of Project X

Use Cases solved

- Auto claims processing.

- Radiology workflow automation.

- CDO workflow.

- Root cause fault resolution.

- SRE life automation.
